

FAMILY (OFFICE) SECURITY

E-Learning

Online Security Training for Wealthy Families and Family Offices

Comprehensive risk and security management means that families and family offices must take preventive measures to deal with risks and potential threats in various forms and shapes and prepare themselves as well as possible. In this context, there are classic, personal awareness training workshops either at the family's home or on the premises of the family office.

A real alternative is online training, which can be conducted at any time, on different mobile devices, at one's own individual learning pace and at any location worldwide.

Only those who know the risks can counter the risks and threats with best practice measures and the right behavior depending on the situation.

KNOWING AND AVOIDING RISKS

The following is taught in the e-Learning:

- Recognizing risks and threats
- Correct behavior in exceptional and threatening situations
- De-escalation techniques
- Keeping children safe on the way to school, to hobbies and friends
- Children alone at home
- Cyberbullying & sexting
- Safe on the road and traveling
- Dealing with social networks & media
- Cybercrime
- Phishing attacks & online scam
- Secure communication via email and messenger services

Together with some of the most renowned and respected security consultants for U/HNWI and Family Offices we have designed and developed our online trainings.

Do you need a reliable training solution?

Contact us - we will be happy to provide you with a free demo account and support you during the implementation in an existing LMS.
